

FORENSIC ANALYSIS REPORT

Case Identifier

CASE-0017

Lead Analyst

John Doe

Current Status

TRANSFERRED_TO_LAB

Generation Date

31/03/2026, 3:29:42 am

Protocol Version

v2.0.4-SECURE

Ledger Anchor

ACTIVE

I. EVIDENCE DESCRIPTION

The Apple Watch was recovered from the suspect's wrist at the time of arrest (18:45 UTC). The device was active and unlocked via biometric pass-through from the suspect's iPhone (Case-0017). To prevent the device from locking or being remotely wiped, it was placed on a portable magnetic charger and secured in a shielded Faraday pouch (Serial: RF-220). Physical condition is excellent; no visible scratches. Secured with tamper-evident seal #13309.

II. FORENSIC TOOLS & ENVIRONMENT

- Magnet AXIOM Cyber: For parsing SQLite databases (Health, Messages, Locations).ð
- iBrave / Cellebrite: To perform a "Full File System" extraction via the diagnostic port.ð
- Google Earth Pro: To visualise the recovered GPS coordinates from the "Workouts" app.

III. ANALYSIS METHODOLOGY

1. Isolation: Transferred device from the Faraday pouch to a shielded forensic workstation.ð
2. Bypass: Used the pre-authenticated session (unlocked state) to perform a Logical and File System extraction.ð
3. Synchronization: Correlated heart rate timestamps with the system clock of the suspect's iPhone (Case-0012).ð
4. Hashing: Generated a SHA-256 hash of the extracted .zip archive to anchor on ForenChain.

IV. OBSERVATIONS & LOGS

- Biometric Date: Heart rate increased from 72 BPM to 148 BPM at exactly 03:02:15 AM on 31/03/2026.ð
- Activity Tracking: The "Health" app recorded a sudden burst of activity (running) lasting 4 minutes during the same window.ð
- GPS Triggers: The last recorded GPS "Home Point" sync matches the crime scene perimeter (Bayan Lepas), despite the suspect's claim of being at home in Simpang Ampat.

V. FINAL DETERMINATION

The biometric and location data recovered from FC-041W provides a high-confidence link to the crime scene. The physiological stress indicators (Heart Rate) match the exact timestamp of the Smart Home breach (Case-0013). The suspect's physical activity at 03:00 AM contradicts all prior statements. Analysis complete; findings hashed to the immutable ledger.

CONFIDENTIAL

This report is cryptographically hashed and securely anchored within the ForenChain blockchain system. Any unauthorized modification invalidates its integrity and legal admissibility.
