

FORENSIC ANALYSIS REPORT

Case ID: CASE-0010

Analyst: John Doe

Generated On: 25/01/2026, 12:34:43 pm

System: ForenChain – Blockchain Chain of Custody

1. Evidence Details

Description: Cisco Router Log files collected from suspect's office network. Suspected to contain records of unauthorized access attempts.

Current Status: transferred_to_lab

2. Forensic Analysis

Tools Used:

- Wireshark (packet capture review)Đ
- Splunk (log analysis)

Methodology:

- Router logs exported from suspect's office network.Đ

- Imported into Splunk for structured log analysis.Đ
- Network traffic reviewed using Wireshark.Đ
- Integrity verified with SHA-256 hash values.

Observations:

- Multiple failed login attempts detected between Jan 17–18, 2026.Đ
- Suspicious IP addresses traced to external networks.Đ
- Evidence shows repeated unauthorized access attempts.Đ
- No signs of log tampering detected.

Conclusion:

- Evidence integrity preserved during acquisition and analysis.Đ
- Network logs are relevant to Case CASE-0010.Đ
- Chain of custody maintained according to Malaysian Forensic SOPs.Đ
- Logs securely archived for examiner review.

This forensic report is system-generated and digitally preserved. Any modification invalidates evidentiary integrity.
